

# 2 Levels Above: Where Small Success

## About Us

October 14, 2007 at 5:56 am ([Information About 2 Levels Above](#)) ([2 levels above](#), [affordable website design](#), [database design](#), [free lance programmer](#), [free lance website developer](#), [php MySQL](#), [SEO expert](#), [small business solutions](#), [small business website](#))

### ☐ Company

I have been in the IT industry for over 10 years now. I have worked anywhere from small family owned businesses to major Fortune 500 companies. During this time frame I noticed that a lot of clients were being overcharged for services that were being provided to them. This was a result of the company that I worked for being the middleman reaping the benefits of my hard work and ignorance on the end of the client. I am strongly against overseas outsourcing but could not blame all these companies/clients looking overseas at places like India to work on their projects. They were just being charged too much. These outsourcing activities were not beneficial either. Although cheap, the solutions provided often lacked in quality due to poor communication, different timezones, and copyright infringement. In 2007 I decided in opening a company that was genuine in intent, extremely reasonable on the budget, and maintained constant contact with the client. Hence 2 Levels Above was born. My company specializes in enabling small businesses and startups compete globally with big national firms. We will provide your company a solid web presence and help you achieve your goals in the digital World in the best way possible. **Business is war and having the right people behind you makes all the difference.**

### ☐ The Design Process

We initially talk with with the prospective client over the phone and go over a needs based assesment. I propose a solution and discuss in detail all the possibilities pertaining to the issue at hand. After that we quote a price and if the client is still interested, require a 50 % upfront. Our price quotes are very realistic and we seldom ever exceed any of my estimates. In some cases face to face meetings can be arranged also.

### ☐ Rates

Currently the base rate is \$30 per hour for web design. Custom, eight- to ten-page websites usually take less than twenty hours to complete. Time estimates are made before work begins and clients are encouraged to specify a maximum price. Word of mouth advertising is very important, so you can be assured that your site will be completed as efficiently as possible.

## Who are we ?

October 14, 2007 at 5:53 am ([Information About 2 Levels Above](#)) ([2 levels above](#), [2levelsabove.com](#), [affordable website design](#), [awesome webdesign](#), [database design](#), [free lance programmer](#), [free lance website developer](#), [php MySQL](#), [seo](#), [seo experts](#), [small business solutions](#), [small business website](#))

We are a team of seasoned web developers, computer specialists, search engine optimization gurus, video game programmers, and free lancers that are well-versed with the latest and greatest web/digital technologies and trends. We can promote, develop, host and administer your next website/solution at a real cost effective and efficient manner because we do not have the overhead that other bigger companies and design studios have.

We will use the latest and greatest technologies to produce well designed websites and business solutions at affordable prices. Many companies charge huge fees and produce poor designs. We strive for well designed solutions that are affordable to small business owners and startups. We will make your next business idea a reality and/or revamp your existing website and make it more productive. We can also assist you with software-as-a-service (SaaS) technologies that will make you realize the benefits of on-demand software – no maintenance, easier configuration, higher reliability, and wider adoption.

Some of our services include:

- ☐ Custom Website Design including complex business logic
- ☐ Logo Design
- ☐ Custom Programming and backend database design
- ☐ Business Logic and Automation resulting in efficient business operation
- ☐ Search Engine Optimization and Marketing resulting in more sales
- ☐ On-demand software adaptation making your organization efficient

Contact us at [info@2levelsabove.com](mailto:info@2levelsabove.com) to discuss your new idea. You and your business will both benefit. We promise you that.
